

European NGO Network on **Green Public Procurement**

Annual GPP Network Meeting

Wed 13 feb 2019, Lisbon, Portugal

Sala Culturgest - CGD

How to incorporate the Circular Economy in **Green Public Procurement?**

With our type of consumption we will need

**Our footprint needs to be ajust
We only have one planet**

So what can we do?

Keep our resources in the economy
Green Public Procurement

Our goals to Portugal

- **Cleaning Products and Services**

Use of tissue paper exclusively made from recycled raw materials. On the other hand, the acquisition of bags for the selective collection of waste produced with the incorporation of recycled raw materials

Our goals to Portugal

- **Copy paper and paper for graphic purposes**

Use recycled paper or incorporate a percentage of recycled raw materials. Reduction of the paper weight used for lower values, except for certain exceptions

Our goals to Portugal

- **Office Buildings and IT Equipment for Offices**

Implementation of good practices in the acquisition of office equipment according to the criteria established by the TopTen Project (www.topten.pt), available at:
<https://topten.pt/business/page/informacao-de-apoio>

Our goals to Portugal

- **Food and catering services**

Implementation of good practices in the acquisition of refrigerated storage appliances for professional or commercial use (such as: automatic food dispensers, refrigerators and canteen benches, freezers for kitchens, among others), according to the criteria established by the TopTen Project (www.topten.pt), available at: <https://topten.pt/business/page/informacao-de-apoio>

Our goals to Portugal

- **Gardening Products and Services**

abandoning the use of pesticides in general and herbicides in particular, opting for non-chemical weeding methodologies in public green spaces

Our goals to Portugal

•Interior Lighting

implementation of good practices in the acquisition of lamps for office and other spaces, according to the criteria established by the TopTen Project (www.topten.pt), <https://topten.pt/business/page/informacao-of-support>

Our goals to Portugal

- **Design, construction and maintenance of roads**

incorporation of recycled aggregates in the bases of road infrastructure, from the recycling processes of construction and demolition waste. On the other hand, we propose the replacement of the conventional practices applied in the layers of wear of the pavements, by MBB - Bituminous Mixtures with Rubber, which incorporate in its constitution, rubber from the recycling processes of used tires

Our goals to Portugal

• Bathroom Faucets

we propose the installation of reducers in all taps in the establishments managed by the Autarchy. In the case of flushing systems, if it is necessary to acquire new equipment, we propose that it will be selected with double discharge and that its classification according to the water efficiency label can be taken into account

Our goals to Portugal

•Transportation

implementation of good practices in the acquisition of vehicles in accordance with the criteria established by the TopTen Project (www.topten.pt), available at: <https://topten.pt/business/page/informacao-de-apoio>

Our goals to Portugal

- **Wastewater infrastructures**

Look for solutions that allow microplastics and synthetic fibers to be filtered in building installations or wastewater treatment systems

Our goals to Portugal

•Water heaters

In case it is necessary to purchase new equipment, we propose that they should be selected taking into account their classification according to the energy efficiency label

Partners to work with:

Lisbon Municipality

LNEG

Public procurement in the health service

Thank you
